Saturday, June 3, 2017

9:30 am - 7:00 pm

A writing student came to her teacher Grace Paley, and said, "I have nothing to say," and Grace said, "Yes you do, you just don't have anybody to say it to. Say it to me."

In this workshop we will explore the increasingly beleaguered act of listening, beginning with our fellow humans and extending to the farthest reaches of the non-human world. We will also explore the Focusing process of listening to the body where we can hear everything we need to know. Expect to spend time writing, drawing, talking, walking, and above all, listening.

The day will close with a concert of contemplative music.
